

The Incurve™ SCBA & Inspire™ Mask

Wear it for your health
Not just for safety

Quick and easy to replace battery pack

Illuminated pressure gauge

Alarm button

Robust shockproof design with rubber cover

Buddy reading LED lights - Shifting green and red. Rapid visualization of pressure

Bluetooth connection

PASS alarm. Alarms if it does not detect movement from the user

The PAC™ unit

Keeps you safe and sound!

Our PAC (Personal Alarm Control unit) excels at everything you've come to expect in regards to safety and is easily upgraded to most of our SCBA's out there. With features like buddy reading, PASS alarm and distress signals, safety comes first. Bluetooth connection ensures connection with Inmode and the possibility to change the settings and downloading log files. It goes hand in hand with our unique concept of Easy Clean-products and can easily and safely be machine washed.

The Inspire™ Mask

Never again hold your breath for a breath of fresh air

Ambient air is great for saving air supply, but connecting the breathing valve in a hurry carries unnecessary risks. To make sure your mask never fills up with smoke, we installed an air hatch that lets you keep the breathing valve connected at all times and still breathe ambient air at will. The hatch opens through a safe double action release mechanism, and needs just a simple push to close.

Voice activated radio for team talk

Loudspeaker for voice amplification

Push-to-talk long range radio

Ex-certified for use in explosive environments

A perfect fit for all Interspiro masks

The Spirocom™ System

Lets your team talk

Meet our groundbreaking voice activated communication system for firefighters. Built to handle the toughest conditions while delivering perfect sound, it brings forth a new era of effortless collaboration between team members.

Rescue handle facilitates saving a wearer in need

Body-shaped shoulder straps and hip belt for optimized weight distribution and comfort

Movable attachment points for accessories

Hip belt and shoulder straps move independently for maximum mobility

Quick-drying Kevlar straps

Quick attach for regulator unit, no tools required

Size is easily adjusted even when wearing the harness

The Incurve™ SCBA

Wear it for your health, not just for safety

Long after leaving a fire scene, firefighters can be exposed to toxic and carcinogenic agents contaminating their personal protective equipment. To reduce this risk of long-term health problems, we developed a SCBA for all cylinder types, with an absolute minimum of textile parts, making it less susceptible to contamination as well as easier to clean. As an added bonus, it's probably the world's most comfortable harness.

The Incurve & Inspire

Wear it for your health, not just for safety

Long after leaving a fire scene, firefighters can be exposed to toxic and carcinogenic agents contaminating their personal protective equipment. To reduce this risk of longterm health problems, we developed a SCBA for all cylinder types, with an absolute minimum of textile parts, making it less susceptible to contamination and much easier to clean. The ergonomic harness distributes the air cylinder's weight perfectly, while its regulator system delivers industry-leading air flow rates along with the lowest breathing resistance.

Designed to keep you breathing.

Minimal textiles for safe cleaning and decontamination, industry leading breathing performance, revolutionary ergonomic design and unmatched communication capabilities.

Experience the highest level of comfort

The hip belt and shoulder straps can be moved independently of each other for maximum mobility

Adjustable for a perfect fit

The harness can be easily adjusted to different body sizes using four different size settings.

Safety comes first, second and third

Our PAC (Personal Alarm Control unit) excels at everything you've come to expect in regards to safety. With features like buddy reading, PASS alarm and distress signals, safety comes first.

Ambient air hatch

The mask is equipped with an ambient air hatch enabling the user to have the mask fully donned and still breathe ambient air to save the compressed air in the cylinder.

Easy to handle

The mask is easy to handle, with a plug & play communication as well as it is easy to clean and disinfect in daily use.

Flexible usage

Flexible configuration options and several attachment points for accessories.

Improve your Inspire & Incurve with this recommended accessory.

Spirocom

The Spirocom voice communication system with integrated team talk function fits perfectly with the Inspire mask.

- Voice activated radio for team talk
- Push-To-Talk Long-distance radio
- Loudspeaker for voice amplification

EVAC

The EVAC evacuation hood is a simple and reliable lifesaver for rescue missions.

- Inflatable neck collar gives automatic sealing
- Large transparent visor with good field of vision

Rescue bag

The Rescue bag system distributes supplementary air into a SCBA during entrapment scenarios.

- Manometer, regulator unit with carabiner and warning signal
- 3 meter medium pressure hose
- Carrying bag with clearly visible reflective strips

Setting the bar for safety

At Interspiro, we've worked for almost a hundred years to keep professionals breathing in hazardous environments. Many of our technological breakthroughs in breathing equipment have become industry standard, such as 300 bar and positive pressure. Today our equipment is used by firefighters and divers all over the world, and we work in close partnership with fire and rescue services, defence, shipping and heavy industry to meet and exceed their requirements. Interspiro is a member of the Ocenco Group and our headquarters is located in Stockholm, Sweden.
